

ITALY | NAPLES, POZZANO TUNNEL SORRENTINA

Installation of ECCO filter

PSP-Ionizer blades of stainless steel

Wash tubes for cleaning of ionizer

ECCO with dry cleaning system of collector

Tunnel site

PROJECT

Built in 2008. The tunnel is situated at the famous coast of Sorrento in the south of Naples.

Aigner Tunnel Technology is responsible for installation of a turn-key filtration plant including the ECCO system and the complete technical equipment. Three fans each with 120 m³/s airflow are installed. 3 ECCO units with total 360 m³/s and technical equipment for high voltage and filter cleaning were supplied. Estimated opening in 2010.

TECHNICAL DATA

System: 1 x ECCO
Length: 5171 m
Tubes: 1, bidirectional traffic
Airflow: 360 m³/s
